

TRAINING OPPORTUNITIES FOR RETIREMENT FACILITIES PROFESSIONALS

Air Handling, Water Treatment & Plumbing Systems *Online Course*

This course is part of the online Retirement Facilities Technician certificate program. A well-educated facilities team avoids risks involved with penalties and mishaps within a facility that are costly, wasteful and can be potentially harmful to residents.

Course benefits include:

Gain skills to maintain complicated HVAC and fire detection systems.

Understand how to test and analyze water samples and apply the appropriate treatments to maintain water quality standards.

Learn how to install pipes & valves in plumbing systems and inspect fire devices.

12 Chapters Focus On:

- Air & heat properties
- Ductwork
- AC units & building pressurization
- Thermal comfort devices & AHU
- Indoor air quality
- Water systems and basic chemistry
- Water systems problems & treatment
- Water testing & internal treatment
- Piping and valves
- Plumbing systems
- Fire protection systems
- Using the psychrometric chart
